POWER RESERVE

# WATCH GUIDE

## POWER RESERVE WATCHES

BY RACHEL GOLD

THE POWER RESERVE INDICATOR is an extremely useful feature for a mechanical watch, and fortunately we're seeing more of them on our favorite dials. Considering that many mechanical timepieces should be operating with at least thirty percent of mainspring capacity, it's helpful to glance at a visible power reserve indicator for a quick check on the amount of remaining stored energy. On the next few pages *iW* is pleased to present a selection of timepieces, varying in price point, that feature a power reserve indicator on the dial. Wind on!

**A. LANGE & SÖHNE :**  
1815 UP/DOWN

The number 1815 on this 39 mm model refers to the birth year of the founder of Saxon precision watchmaking, Ferdinand A. Lange, whose legendary pocket watches inspire the design of the piece. The watch is powered by a Lange manufacture calibre L051.2 manually wound movement.

PRICE: \$27,400

GIRARD-PERREGAUX

17

**SEA HAWK**

PRICE: \$13,800

This 44mm black ceramic piece is powered by an automatic GP03300-0074 movement and has a power reserve of 46 hours minimum. Functions include: hours, minutes, small seconds, date and power reserve indication. The watch is water resistant to 1,000 feet.

GLASHÜTTE ORIGINAL

18

**PANORESERVE**

PRICE: \$11,300

The heart of the PanoReserve is the manually wound 48-jewel Calibre 65-01 with a 42-hour power reserve. The off-center hour/minute display features faceted red gold hands and applied red gold hour indexes. The stainless steel case measures 40mm.

HARRY WINSTON

19

**HISTOIRE DE TOURBILLON 3**

PRICE: \$657,200

The third series in Harry Winston's exploration of the tourbillon features two rotating escapements as well as three tourbillons in action that are each rotating at different speeds – performing gravity-defying functions. This piece is limited to 20 pieces, the case measures 65 x 45.9mm, and the power reserve is 50 hours.

HAUTLENCE

20

**HL2.3**

PRICE: \$192,500

Known for offering a different way of reading time, this brand has included special features, such as retrograde minutes and a power reserve indicator. The case is made of grade-5 titanium and is coated with black DLC. It measures 50 x 42 x 17.8mm.
